

## Comet Limited project update December 2009

On 18<sup>th</sup> of December 2009 the rollout of the first *Comet Special Limited* has been celebrated!

Together with the project managing company **G2B** the serial number one had been handed over to his owner. The *Special Limited* is exclusively produced in a limited edition of 10 units for **G2B**.

The event took place in Fk's headquarter in Speyer under supervision of G2B president *Thomas Geissel* and FK president *Peter Funk*. Over 70 selected guests had joined the event, beside the new owner also many international FK sales partners, Fk's production management, different journalists from aviation press, a local TV station and some representatives of the different project sponsors such as *BECKER AVIONICS*, *SENNHEISER*, *CarRento* and others.

The rollout itself was celebrated as a real unveiling – up to this moment except of the designers and manufacturing team, really no one had ever seen the plane before! So the attached pictures are the really first ones published at present.

We are happy to say that the final product impressed everyone! Its modified shape and sleek lines makes it looking a lot more agile than the original design.

The fine Alcantara and leather interior and the high end glass instrumentation provides an advanced look from the inside also. Nice details such as the race car-fuel-filler cap or the new winglet style wingtips are rounding up the look of the *Special Limited*.

As soon as the first plane is receiving its registration documents the flight tests programm will start, which is expected during middle of January.

So updates  
will follow  
soon...!
